

## FOR IMMEDIATE RELEASE

### **All West Communications Fiber Network Expands to Farmington, Utah**

*Connecting communities to the world through internet, TV and phone services.*

**KAMAS, UTAH | December 15, 2022** – All West Communications is thrilled to announce the launch of its multi-gig fiber optic internet, streaming TV service and digital phone solutions—on a redundant network—to the residents of Farmington using 100% private funding.

The build will include more than 100 miles of fiber and duct, which will provide services to over 6,300 homes and businesses.

*Farmington City welcomes All West Communications, Inc. as a leading provider of fiber-to-the-home. We are excited about All West's commitment to building out a network capable of serving Farmington well into the future and without any commitment of public funds. – Mayor Anderson*

This is just one of the major buildouts All West is investing in, and they are excited to be expanding their service offerings to these communities. The work in Farmington is part of All West's commitment to invest hundreds of millions of dollars to build an advanced, 100% fiber network to communities across Utah and Wyoming.

Internet offerings will include speeds from 1 Gig up to 8 Gig starting at \$70 a month. They will also be offering other excellent services, including managed wi-fi, which gives customers complete control of their home network, All West.tv, our digital TV streaming service with over 115+ channels to choose from, and Phone, with both local and long-distance options.

“All West is excited to announce Farmington as our first multi-gig community,” Matt Weller, All West Communications President, stated. “We believe everyone should have access to fast and reliable internet no matter where they live. Our team is looking forward to serving the residents and businesses in the area.”

All West also participates in the Affordable Connectivity Program (ACP), an FCC program that reduces the monthly cost of internet service for qualified households. To learn more about ACP, please visit [Home - ACP - Universal Service Administrative Company \(affordableconnectivity.gov\)](https://www.fcc.gov/affordableconnectivity-program)

All West Communications believes in delivering the best possible services to their communities—and investing in all-fiber networks is one way they do this. Fiber provides the ability to offer faster speeds and a more reliable, stable network, compared to wireless or satellite options. As a local company, they treat their customers as more than just a number. All West is looking forward to partnering with you for your telecommunication needs.
